HYDRAULIC AND TIDE TABLES,

TO AID THE CALCULATION OF WATER AND MILL POWER, WATER SUPPLY, DRAINAGE AND NAVIGABLE RIVERS. WITH SYNOPSIS OF RAIN-FALL IN GREAT BRITAIN; TOGETHER WITH THE PROPERTIES AND STRENGTH OF MATERIALS; USEFUL NUMBERS; POWERS, ROOTS; AND LOGARITHMS.

BY NATHANIEL BEARDMORE, MEMBER OF THE INSTITUTION OF CIVIL ENGINEERS.

The First Edition of this Work was received with much greater favour than the author had at all expected; and the sale was large, for so technical a work. To extend the use of this edition as a hand-book for the Engineer, in matters relating to Hydraulics and Hydrodynamics, many new Tables have been constructed, and Tide Tables are inserted at the close of the book, chiefly compiled from the data offered in the Admiralty Tide Tables and from the Nautical Almanac.

The introductory remarks on the use of the Tables, have been amended, and more information is interwoven, chiefly on our English rivers—the drainage areas of the more important of which have been especially compiled from the Ordnance Map. In the original remarks on tides and rivers, experience and practice are the great guide; and therefore, to obtain the best data for practical results we have carefully collated all the well-authenticated data within our reach or personal experience, and had them condensed into tabular forms.—*Preface to Second Edition.*

KEY to TATE'S EXERCISES on MECHANICS and NATURAL PHILOSOPHY: Containing full Solutions to all the unworked Examples and Problems.

By THOMAS TATE, F.R.A.S. of Exeter Training College, Twickenham.

"Mr. Tate's book gives to a practical and popular form the substance of every mechanical principle, whether belonging to statics or dynamics, which can ever become applicable in any combination of engineering operations; and in order that they may be fully understood, it supplies under each a number of illustrative examples the solutions of which are given in the little book now before us. Practical mechanics will derive from it the greatest assistance, and the number of examples worked will serve to make the calculations perfectly obvious."—*Morning Advertiser.*
